If you have every thought about making money from your woodwork craft hobby, This is the place to be. Here at Passion for Woodwork we provide quality business advice, hints and tips to help turn your passion to profit. There is money to be made from your hobby and with the right advice and a little effort you can live the life of your dreams. Working at what you love and making money from it.

For a while now we have been selling a book called "Woodworking as a Business : Turning Your Passion to Profit"

The book has been a staple for many people building a woodworking craft business. Take a look at it here .

So why start the Passion for Woodwork site ?

Simple you asked for it, well not exactly you but people like you.

People have been asking us for a site that not only gives great woodwork business information and tools but also information on, woodworking patterns and plans, advertising, marketing for woodwork products and everything related to starting and running a woodwork craft business.

For instance may people want to know how to optimise their stall in a craft or trade show to get the maximum benefit from the expensive promotional event. But they don't just want the professionals advice, they want, no "need", to hear it from the front line the people who each day, week or month participate in all aspects of running a woodworking craft business.

So this site is about building a community. A community of woodworkers, carvers, turners and other craft enthusiasts who have or want to make money doing what they love with wood. The site is a free member ship site. It cost nothing to join up and be part of the community, just fill in the registration form [here](#).

Passion for Woodwork Site features:

- User Forum - where you can talk to other like minded people

- Latest news and tips from the Passion for Woodwork team
